

Going Beyond

Scaling our business

Mapletree pursues growth opportunities, both locally and internationally, as part of its business plan. This year, we started building our corporate lodging/serviced apartment platform as part of our commitment to deliver sustainable value to our stakeholders. The move took us out of Asia and into new territories such as the United States, and will continue to bring us to new markets around the world. At the same time, we will continue to expand our footprint in Asia and deepen our presence in familiar markets in the region by entering new real estate sectors. Today, our S\$28.4 billion portfolio spans logistics, industrial, office, retail, residential and corporate lodging/ serviced apartment properties.
