Challenging operating environment in view of global uncertainties

- ✦ 2023 will be a challenging year with increased risk to global financial stability due to the banking crisis and geo-economic fragmentation. Increasing property operating expenses and borrowing costs continue to exert pressure on distributions. The Manager will adopt cost-mitigating measures while focusing on tenant retention and forward lease renewals to maintain a stable portfolio occupancy

Singapore

- Singapore economy grew by 0.1% y-o-y in the quarter ended 31 Mar 2023, slower than the 2.1% growth in the preceding quarter¹
- Business sentiment declined for the fifth consecutive quarter for 2Q2023 due to negative sentiment in the manufacturing and wholesale trade sectors. Rising interest rates, latent vulnerabilities of the global financial system and escalations in geopolitical tensions are likely to weigh on overall business confidence in the coming months²

North America

- According to CBRE³, primary market data centre inventory in North America⁴ increased 17% y-o-y to 3,928.7 MW in 2022. However, the rate of growth moderated in H2 2022 due to power supply constraints and unfavorable macroeconomic conditions
- Continued supply constraints are expected to maintain an upward pressure on rents in H1 2023. Average monthly asking rents for colocation space in primary markets rose 14.5% y-o-y to US\$137.90 kW/month in H2 2022
